*Cloud*ReadyAI

Assessment Summary

EXECUTIVE OVERVIEW

This is a placeholder executive overview generated by CloudReadyAI. In a later iteration, this will summarize key findings, migration strategy, and projected benefits for the client.

ENVIRONMENT SNAPSHOT

Total Servers **42**	Total vCPU **168 vCPU**
Total RAM **1.5 TB**	Total Storage **320 TB**
Distinct Applications **12**	

READINESS SCORE

Overall R-Score

Rating: B+

Notes: Workloads are generally cloud-ready with some modernization required.

KEY RECOMMENDATIONS

Recommendation 1
Prioritize migration of low-risk, high-value workloads in Wave 1.

Recommendation 2
Refactor legacy .NET applications to PaaS where feasible.

Recommendation 3
Introduce centralized monitoring and logging in the target cloud.

TARGET ARCHITECTURE OVERVIEW

Target cloud architecture diagram will appear here (Landing Zone, VPC/VNet layout, security, and core services).

CloudReadyAI can generate cloud-ready landing zone architectures and migration sequencing that align with enterprise best practices for security, networking, and resiliency.
