Client: Client Name (TODO: from DB) | Run ID: run-35073330 | Target Cloud: AWS

TARGET ARCHITECTURE OVERVIEW

This report outlines the proposed target cloud architecture, including landing zone design, networking, security, and data services.

> High-level target architecture diagram appears here (Landing Zone, network segmentation, core services, security controls).

LANDING ZONE DESIGN

This section describes the proposed landing zone aligned to enterprise best practices for account structure, identity, security, and networking.

Landing zone details have not yet been populated for this assessment.

NETWORK TOPOLOGY

Network topology details have not yet been populated for this assessment.

SECURITY & COMPLIANCE MODEL

Security model details will be populated once controls, logging, monitoring, and access patterns are defined for the target environment.

DATA PLATFORM & MODERNIZATION

Data platform details will be populated as databases and analytics workloads are mapped to cloud-native services.

MIGRATION WAVES

Migration waves have not yet been sequenced. CloudReadyAI can group workloads into waves based on risk, complexity, and business impact.
